

Cambodia University Scholarship Program Cambodia

Grant Category:	Education
Project Partner:	Cambodian Children's Fund (CCF)
Project Status:	Ongoing
Start Date:	Aug 2014
Completion Date:	Until all students complete their studies

Project Description

The University Scholarship support program aims to provide gifted Cambodian students with an opportunity to complete education at a higher level so they can gain the skills and knowledge to enable them to play a key role in the development of their communities and country.

The education system in Cambodia lacks the educational infrastructure and opportunities for students with potential. A lack of quality teachers with many lacking degrees or professional training, and limited or no infrastructure at higher levels means many students are unable to realise their potential.

The University Scholarships program covers students' education costs including tuition fees, schoolbooks and living expenses for the duration of the course enabling students to complete their higher education.

Objective

The Cambodian education system lacks educational infrastructure and opportunities for students with potential. Qualified teachers are lacking at the secondary and university study is limited to due low resources.

The Program aims to overcome this issue through the funding of dedicated students who will have the skills to positively impact on the growth of the Cambodian system, thereby supporting the development of the education system as the Cambodian economy expands.

Impact

The University Scholarships program covers students' education costs including tuition fees, schoolbooks and living expenses for the duration of the course enabling students to complete either a Bachelor or Masters degree.
